

PR10

ROBOTIC ARM PALLETIZER

Technical data	PR10
Cycles/minute	8
Max. pallet height	2100 mm.
Set up power	8 Kw
Voltage	380 Volt
Air consumption	250 l./min.

OPTIONAL

- Layer sheet dispenser and relevant magazine
- Pallet magazine capacity 10/18 pallets
- Pallet conveyor

Automatic machine suitable to palletize shrinkpacks, cases, or other kinds of packed products. Gripper head holding the packs sideways during the handling, in order to eliminate any space between them at deposit, with 360° rotation in order to optimize the product disposition on the pallet. The head can pick up one or more packs at a time. Axes movement by brushless motors controlled by CNC.
