

SL

**SIDE LOAD
CASE PACKER**

The SL line of side load case packers is a highly versatile and capable of packaging many types of products. From boxes/bulky products that can be stacked to individual products like bottles. This model can do cartons or RSC style case blanks Models Range in size and speed depending on the product and the collation. Slow speed models can use a Monobloc style design where the case erector and case sealer are all integrated in one machine. Case blanks can be sealed by tape or glue.
